DETAILED ACTION

Response to Amendment

1. Receipt is acknowledged of the Amendment and Remarks filed September 14, 2004.

Allowable Subject Matter

2. Claims 1-5, 7, 8, 10, 12-14, and 16-20 are allowable.

The following is an examiner's statement of reasons for allowance: none of the cited prior arts of record (Miki, JP 05334488 A; Thomas, US 4,263,504) taken alone or in combination of other references discloses, teaches or fairly suggests the claimed two-dimensional redundant bit patterns comprising repeating patterns of a bit string forming a respective machine readable code corresponding to at least one character having an appearance of resembling at least one character. In the present application, a single spatially redundant underlying 2D pattern is formed of a two dimensional arrangement of marks that encodes the meaning of a string of characters into the two-dimensional symbol. The sequence of human readable templates is then used to produce a string of graphical entitles each of which appears to a human reader as the characters of the original message string. The cited reference would not be able to reconstruct the original information string since they do not provide a redundant underlying pattern in each symbol that contains the entire message. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
